

PFISTERER is building a specialized offshore wind team under the management of Dr. Peter Müller

Winterbach, Germany – September 21, 2018 – PFISTERER has accompanied the emergence of the offshore wind industry right from the start with innovative products and solutions. In the future, the commitment will be further strengthened and bundled in a specialized team under the management of Dr. Peter Müller within the PTS (Power Transmission Solutions) Business Unit Cable.

PFISTERER has been there from the very beginning. We have closely accompanied the process from the idea of a power station on the high seas to the construction of the first offshore wind farm. PFISTERER has set industry standards, our project management and our products are state-of-the-art today.

Especially in recent years, wind energy has developed rapidly, in particular at sea. We have the ambition to expand our leading role in the field of connection systems for modern offshore wind farms. Our experienced and longtime employee, Dr. Ing. Peter Müller, is the Head of the Offshore Wind department with immediate effect, in which all activities around the business area converge. "So far we have focused mainly on the European market, but in the future we also want to become increasingly active on other continents. We are already in initial negotiations in Taiwan and in the USA," says Mr. Müller.

The world's most compact connection system for 66 kV offshore wind farms

PFISTERER is currently developing the world's most compact connection system for the high-voltage level up to 72.5 kV - fast, lean, safe and flexible. It features a dry plug-in design, making it easy to install, water-proof, UV-resistant, submersible, touch-proof and maintenance-free.

"Our new plug is a good 30% smaller and 35% lighter than its predecessor and is in no way inferior to it. With the new products enormous space and time savings can be achieved. We are looking forward to present the complete product range at WindEnergy in Hamburg next week", says Mr. Müller.

PFISTERER at WindEnergy Hamburg

From 25 to 28 September, the leading international trade fair for the wind energy industry - WindEnergy Hamburg - will take place at the Hamburg Exhibition Center. We are looking forward to see you at our booth in hall B6, booth 560 and are happy to answer your questions. For appointments, please contact Mr. Müller.

About PFISTERER

PFISTERER is a leading independent manufacturer of cable, insulators and overhead line accessories for sensitive interfaces in energy networks. The Group is headquartered in Winterbach, near Stuttgart in southern Germany. PFISTERER
